### Experience Summary

<b>Organization</b>	Prime Softech Solutions Private Limited
<b>Customer</b>	Prexam
<b>Role</b>	Software Engineer
<b>Technologies</b>	Core Java, Spring Boot, JPA, Maven, IntelliJ IDEA, Github, Postman, Workbench, MySQL.
<b>Responsibilities &amp; Skills</b>	<ul style="list-style-type: none"><li>• Worked for requirement gathering</li><li>• CR development</li><li>• Approach designing</li><li>• Testing, Implementation and deployment.</li></ul>
<b>Achievement</b>	Fast learner and value creator for new technologies – Employer appreciation
<b>Project Description</b>	<p>PREXAM is a testing tool for students to check their preparedness. It is a product by Employer. The tests are generated by selecting questions randomly from the database based on the chapters and subject you selected. That means even if you select the same combination of subject and chapters you would get a different paper every time and the questions you get would be different than what other user might have received for the same combination.</p> <p>Each test is followed by a solution which you can print or store for future reference. All your tests would be saved and available for review. We would soon be including your graph of preparedness for your exam so you can evaluate where you need to work more on.</p>

<b>Organization</b>	Prime Softech Solutions Private Limited
<b>Customer</b>	Shipment Management
<b>Role</b>	Software Developer
<b>Technologies</b>	Core Java, Spring Boot, JPA, Maven, Postman, MySQL
<b>Responsibilities &amp; Skills</b>	<ul style="list-style-type: none"><li>• Logic Building</li><li>• Involved in designing development approach as per client requirement</li><li>• Involved in release and deployment in client environment</li><li>• Create rest API</li><li>• Production Deployments</li></ul>
<b>Project Description</b>	<p>Shipment Management is web application for company which provides international shipping solutions. Using this company employees and customers can track their shipments. There are different services included in this project for following purposes:</p> <p>To create shipments, validate data of shipments, correct the invalid/error data of shipments, calculate shipping path for shipments, store different data related to shipment, distribute the shipments to different systems.</p>

<b>Organization</b>	Prime Softech Solutions Private Limited
<b>Customer</b>	MyClassAdmin
<b>Role</b>	Software Engineer
<b>Technologies</b>	Core Java, Spring Boot, JPA, Maven, IntelliJ IDEA, JIRA, SVN, Postman, Work Bench, Mysql.

<b>Responsibilities &amp; Skills</b>	<ul style="list-style-type: none"> <li>Gathering Project requirements</li> <li>Database Designing and Logic Building</li> <li>Involved in designing development approach as per client requirement</li> <li>Involved in release and deployment in client environment</li> </ul>
<b>Project Description</b>	MyClassAdmin aims to aid teachers and administrators of educational institutes in such an effective way, that they need to spend least time on these mundane activities and concentrate their efforts in developing innovative techniques to help students perform better. We have started with beta product with our first module called "Paper Setter", which is a tool to generate test papers and their solutions and get them in printable format ready to distribute in the class to the students. Teacher and staff do not have to spend their time in formatting the test paper layout and typing the questions and solutions. Beginning with the MCQ type questions for competitive examinations which in general require lot of practice tests to be conducted.

<b>Organization</b>	Prime Softech Solutions Private Limited
<b>Customer</b>	Simatech Automation
